명세서

|                      |                                                  |
|----------------------|--------------------------------------------------|
| 제품 모델                | AT91SAM9R64-CU                                   |
| 제조사                  | Micrel / Microchip Technology                    |
| 기술                   | IC MCU 32BIT 32KB ROM 144BGA                     |
| 범주                   | 집적 회로 (IC) > 임베디드 - 마이크로 컨트롤러                    |
| 부품 상태                | 5350 pcs Stock                                   |
| 전압 - 공급 (VCC / Vdd에) | 1.65 V ~ 3.6 V                                   |
| 제조업체 장치 패키지          | 144-BGA (13x13)                                  |
| 속도                   | 240MHz                                           |
| 연속                   | SAM9R                                            |
| RAM 크기               | 72K x 8                                          |
| 프로그램 메모리 유형          | ROM                                              |
| 프로그램 메모리 크기          | 32KB (32K x 8)                                   |
| 주변                   | AC'97, POR, PWM, WDT                             |
| 포장                   | Tray                                             |
| 패키지 / 케이스            | 144-LFBGA                                        |
| 발진기 유형               | Internal                                         |
| 작동 온도                | -40°C ~ 85°C (TA)                                |
| I / O 수              | 49                                               |
| EEPROM 크기            | -                                                |
| 데이터 컨버터              | A/D 3x10b                                        |
| 코어 크기                | 16/32-Bit                                        |
| 코어 프로세서              | ARM9®                                            |
| 연결                   | EBI/EMI, I²C, Memory Card, SPI, SSC, UART/USART, |
